REMINDER

JEWELLERY APPRAISAL CERTIFICATION

WHEN LAST WAS YOUR JEWELLERY PROFESSIONALLY VALUED / UPDATED?

You need to know that the value you place on your possessions which you insure is **accurately** made based on a quality assessment by an experienced international, known and trusted jeweler-gemologist for your and their protection.

The consequence of inappropriate values being placed on the items is obvious. Most people under value goods to save on premiums and then if they claim, they feel disgruntled and negatively towards the insurer due to an undervalued payout. **Correct valuation in this case encourages a satisfied customer.** It also maximizes your premium income.

The added value of this **unique service** that I offer is that the valuations can be **done in your residence to minimize security risk or in our private laboratory in Constantia whilst you wait.**

Due to **unavoidable** fluctuations in international and local markets, it is **important your document should be updated to reflect the current replacement values annually.** This is a very cost effective and speedy procedure, which does not inconvenience you. Should you wish your document to be updated to reflect the current replacement or market value of your items, kindly forward your contact details to us by fax / email and **we will quote you accordingly.**

Please bear in mind that until such time as your jewellery has been professionally valued or updated, any claim for lost or damaged jewellery, watches etc, is unlikely to be paid satisfactorily.

Should you wish to know more about our services, you may contact me on the above telephone numbers or e-mail to make an appointment.

ROGER C TRIGG G.G. F.G.A.

Graduate Gemologist (New York) U.S.A
