

05 June 2018

Good day all,

CLEAR VISION BURGLAR BARS

Background

Over an extended period of time the home security market has been developing more ways to secure your property that will not affect the aesthetic value of your property.

Clear burglar bars are constructed from polycarbonate sheets with special UV protection.

These burglar bars have been available in the market for an extended period and this has allowed the insurance industry valuable time to investigate the practicality of the product and whether it will be acceptable to the insurance industry.

We have found that the clear burglar bars are impact resistant, offering similar protection to standard steel burglar bars and it is currently the preferred method to secure your property.

RESOLUTION

Renasa Insurance will accept the installation of such clear burglar bars if the policy has a basic requirement for burglar bars in front of all opening windows. This will be accepted under the proviso that the installation is done by a certified supplier/ provider and that such proof of installation is available should it be required

New quotes and / or existing policies may be accepted/ amended on this basis with immediate effect.

Trust that you find this in order. Please contact me should you have any queries

A handwritten signature in black ink, appearing to read 'Joan Fulton', with a small dot at the end.
