DRIVE WITH CONFIDENCE IN 2026

In the Q4 Newsletter, we introduced MUA's brand-new Tyre and Rim Cover, designed to protect clients against the increasingly common — and costly — damage caused by potholes, debris, and deteriorating road surfaces.

Now that the product has officially launched on 1 January 2026, we are encouraging all brokers and clients to take a moment to review their motor policies and ensure they're getting the most out of this valuable new optional extension.

Since announcing the product, we have already seen exceptional interest from policyholders who appreciate:

- predictable, capped costs for tyre and rim repairs
- the convenience of 24/7 flat-tyre assistance
- towing support when a spare is not available
- flexible cover tiers to match their budget and risk appetite

If you missed the December newsletter, here are the benefits clients are finding most valuable:

- Repair or replacement of tyres damaged by punctures, cuts, bruises, and impact breaks
- Rim repairs (excluding replacements)
- Free wheel alignment & balancing when all four tyres are replaced through our supplier network
- Flat-tyre assistance, towing and 24/7 support
- Three affordable tiers: Blue, Silver, and Gold, starting from only R220 per month

Perfect for SA Road Conditions

With road hazards on the rise, the Tyre and Rim Cover offers peace of mind for daily commuters, holiday travellers, off-road enthusiasts, and families alike.

We recommend:

- reviewing your client portfolio for high-risk road users
- advising clients with older tyres to check manufacturing dates
- discussing the three cover tiers to ensure suitability
- directing clients to the product brochure available on our website

If your clients have not activated the MUA Tyre and Rim Cover yet, now is the ideal time to explore the options available and enjoy a smoother, more confident start to the year. For more information, speak to your MUA Account Executive or visit our website.
